FINISHING & PACKAGING

All parts are degreased by hot spraying. After rinsing, they go through anti-corrosion phosphating and then receive a layer of thermosetting powder based on epoxy and polyester resins, without lead or solvent, baked at 200 °C.

Available in grey 7035 - anthracite grey 7016

➔ The product must be positioned indoor or under cover.

➔ Module delivered, mounted in a carton.

WARRANTY

1 year warranty (from the date of delivery, covering operating and manufacturing defects).

The warranty cannot be applied for defects arising from modifications made to the product without authorization, for dysfunctions linked to normal wear and tear, when used in a corrosive or aggressive environment unsuitable for the sheet metal product, for negligence and vandalism.

This warranty covers the supply of defective parts and the related labor cost. Any intervention under the warranty does not generate any extension of its duration.

SUITABLE FOR ANY BRANCH OF INDUSTRY, TOURISM, EDUCATION...
